

Portable Dust Collectors

The **MAX MOBILAIR-1.0 SCH** offers high filtration efficiencies with the convenience of portability. With the articulated pick-up arm, this unit can be moved as the work-flow dictates. This unit has been designed for controlling smoke, dust, & other airborne contaminants.

The filtered air can be returned right back into the work place acting as a heat recovery device. The **MOBILAIR** helps to improve working conditions all the while reducing the level of exhausting and related in-plant maintenance costs.

Standard Features:

- On-board washable filter captures particles as small as 0.5 micron
- Seven-foot long adjustable arm
- Arm captures contaminants prior to entering the respiratory zone of operator
- Manually initiated reverse pulse filter cleaning system
- Cabinet constructed of 14 gauge steel
- Baked powder paint
- Internal Deflector Plate
- 4" Swivel Casters
- Solid Tube Flex Arm

Capacity	850 CFM @ 3.5" wc
Dimensions	24" x 31" x 43"
Capture Arm	7' x 6" diameter
Weight	200 lbs.
Motor	1 HP TEFC 115/230/60
Filter	2 pleated cartridges
Noise Level	72 dB (A) @ 5'

Options:

- Pneumatic Casters
- Light Kit
- 3-phase motor
- Pressure differential gauge
- HEPA/carbon after-filters
- Poly-sorb carbon after-filter
