

Industrial Central Vacuum Systems

MODEL CV-60

BENEFITS

Central Vacuum Cleaning System

Our Systems incorporate a low pressure drop across the filter separator resulting in less energy consumption.

Unit shape and size can be customized to your specific space and process requirements. Depending on your application and available space, we are able to build and install a system to meet your specific application requirements.

STANDARD FEATURES

- Piping and ducting systems that do not plug!
- Supports 1 to 37 Users
- Dynamic type vacuum producers, so operators feel like they have the entire system to themselves
- Complete system design
- Automated controls package
- High Efficiency filtration systems
- Energy Conserving
- Low maintenance
- Vacuum levels up to 16" Hg
- Engineered Pulse Jet filter cleaning system

CV MODEL - 60 OPTIONS	
Operators/Users supported using 25' x 1.5" ID Hose	1-37
Operators/Users supported using 25' x 2.0" ID Hose	1-17
Nominal CFM	3150
Turn - Key Installation	Complete Installation Start-Up & Training
Primary Filter Area (Sq Ft)	630ft ²
Discharge Storage	55 gal. 2.0 cubic yards
Discharge Devices	Rotary Valve/Slide Gate/ Material Transfer
Automation	Automatic protection of vital equipment
Filtration	Extreme Durability & HEPA Final Filtration
Complete Piping Design	Engineered for Vacuum/ Pressure Systems
