

Cartridge Filter Dust Collectors

An effective and reliable airborne particle type dust collector with a compact foot plan.

Our systems incorporate a low-pressure drop across the unit resulting in the less energy consumption. This feature reduces maintenance requirements and helps lower operating costs using 30% less energy than traditional units.

Unit shape and size can be customized to your specific space and process requirements.

We guarantee the lowest energy design of any competing offer! Call to find out more.

Standard Features:

- Filter efficiency of 99.97% @ 0.5 micron
- High-efficiency airfoil blade industrial-grade fan
- High side air entry increases cleaning efficiency
- Low re-entrainment of dust from cleaning mode to filter mode
- Engineered nozzles provide the most effective filter cleaning in the industry
- Compressed air cleaning component externally mounted for convenient access
- Standard hopper with tray arrangement
- Multiple inlet arrangements
- dependable dust-tight construction
- Durable heavy-duty welded steel cartridge cage support

Model	Fan Hp	Filter Area	CFM Range
CCDC-2	5	450/680	1125-1700
CCDC-4	7.5	900/1360	2250-6250
CCDC-6	10	1350/2040	3375-5100
CCDC-9	15	2025/3060	5063-7650
CCDC-12	15	2400/4000	6000-10,000

Options:

- Push button motor starter
- HEPA filter discharge
- Special materials and finishes
- Dust hopper/Dust pail
- Custom tuned fan outlet - reduces dB
- Micro-processor controls
- Turn-key installation
- Exhaust silencer
