

## Loader Vacuum Series

The Regenerative Loader Vacuum Series let you clean up your dry spills with ease using a super-efficient, triple-filtration system using a powerful regenerative vacuum producer.

The Loader systems offer options in storage size, horsepower, and filtration, so you'll get exactly the performance you need for every application!

### Standard Features:

- Supports 2 to 7 operators using 1.5 in. ID hose, 3 operators using 2 in. ID hose, or other combinations
- Integrated storage hopper, .75 cubic yd to 2 cubic yd
- Power options include (60 Hz) 208v, 230v, 460v, 575v, and (50 Hz) 380v
- Primary filter efficiency of 99.99% @ 0.4 micron
- In-line safety filter included for protection of the pump in case of filter primary failure, easily upgrades to HEPA
- Continuous duty vacuum producer available in 15 HP to 30 HP
- Effective manual shaker or pulse-jet cleaning system
- Easy-to-read filter condition differential pressure gauge
- Heavy-duty, compact, all steel frame. See separate sheet for sizes
- Shipping Weight - 2100lbs
- Configurable for portable or central vacuum systems

### Options:

- HEPA filtration
- Pulse jet filter cleaning
- Positive displacement vacuum pump
- Hot galvanized hopper lift, ideal for corrosive or outdoor environments
