

Industrial Vacuum Toolkit

PLĒCO™ 5S 6-Piece Toolkit

OVERVIEW: 6-Piece Toolkit

This toolkit fits the 5S - “Sort, Set in Order, Shine, Standardize, and Sustain” methodology and is specially designed to enhance the performance, reach, and safety of your industrial vacuum system. Each component is engineered for durability, ease of use, and maximum efficiency in demanding environments. From lightweight, static-conductive hoses to heavy-duty wands and precision cleaning tools, this kit equips operators to handle a wide range of debris and dust collection tasks—safely and effectively. Stay organized and operating at peak performance with reliable attachments that get the job done.

PRODUCT FEATURES

Hose Assembly

- Lightweight hose featuring a conductive copolymer material with a yellow anti marking coating. Comes with static conductive swivel cuff.

Operators Wand

- Reach those hard to get places with a wand that is heavy duty. Compatible with other attachments.

Crevice Tool

- Reach those tight areas with the crevice tool. Its conductive construction allows static to flow through the hose to the vacuum.

Specialty Floor Tool

- Made of aluminum, its built to last. It combs the floor for dust dirt and debris.

Dust Tool

- Control dust and debris with this tool. Attaches on the end of the hose.

Hose Rack

- Keep your heavy duty hoses here stay organized and protect your hoses.
